

Aluminium control arm

 as OE Problem	 Solution 
<p>Control arms, manufactured in low-priced aluminium casting process, tend to have inadequate resistance to fatigue.</p>	<ul style="list-style-type: none"> • Forging production (in accordance with OE) using custom made tools • Quality aluminium materials with high mechanical strength properties • Inspection and testing of parts
Effect	Advantage
<p>Impact loads can cause such components to break while driving, resulting in a serious safety hazard due to loss of vehicle control</p>	<p>High quality, safety-relevant vehicle parts with long service lives</p>
