

DRIVER'S BEST FRIEND

[MEYLE-No.: 112 320 0011, Short no.: MCF0099]

## Product of the month

As DRIVER'S BEST FRIEND we offer 23,000 solutions to make vehicles around the globe perform longer and more reliably, so that motorists all over the world can safely rely on MEYLE quality. Our DRIVER'S BEST FRIEND product of the month: the MEYLE-ORIGINAL cabin air filter.

- **Catering for a wide range:** The range of MEYLE-ORIGINAL cabin air filters currently features 398 different applications – which caters for 80 per cent of the vehicle registered in Europe.
- **Ready-to-fit design:** All MEYLE-ORIGINAL cabin air filters are ready-to-fit assemblies. Several filter types feature a flexible edge bonding which makes them particularly easy to install and prevents the risk of tearing during assembly [easy-to-fit design].
- **Improving passenger health:** Air pollution is becoming an increasingly serious concern. Cabin air filters effectively remove dust, pollen, allergens and soot from the intake air. The result: Clean air free from hazardous substances.
- **Two different specifications:** MEYLE supplies both, particle filters and activated carbon filters. While particle filters reliably retain airborne particles (described above), activated carbon filters additionally trap or convert unpleasant or hazardous gases – for example ozone is broken down into oxygen.

**MEYLE's advice:**

Have your cabin air filters replaced twice a year and an additional activated carbon filter installed to prevent harmful substances from entering the car. Regular replacement of the cabin air filters is particularly important for passengers suffering from allergies.
